

Oracle Cloud Solutions by MiCORE

Transform Your Business with Oracle Cloud Solutions by MiCORE

For organizations facing challenges to be faster, more agile, transparent, and cost efficient, MiCORE provides a comprehensive portfolio of cloud services and best practices designed to help achieve operational excellence.

MiCORE's **Oracle Cloud Solutions** give clients the power and freedom to decide how their cloud solution is deployed, leading to the implementation of a cloud environment that is uniquely tailored to their business requirements and plans for growth.

MiCORE's Oracle Cloud Center of Excellence

At the heart of MiCORE's cloud services is the **Cloud Center of Excellence**, where our experts are hard at work building out services, solutions, and best practices that help companies move their environments to the Oracle Cloud. The specialists in our CoE are currently focused on developing:

- Tools and accelerators for easier cloud adoption
- Business Intelligence (BI) and Analytics in the cloud
- Enterprise data management in a hybrid cloud environment
- "Lift and Shift" architecture best practices
- ...and more!

Areas of Expertise

As an Oracle Cloud Center of Excellence, MiCORE has specialized expertise in implementing and supporting a variety of cloud use cases. Some of the most popular use cases our experts have supported include:

- ✓ **Dev Ops.** Deploy better software - faster - and in the cloud.
- ✓ **BI Cloud Services.** Extend your analytics with the power of Oracle Database, in the cloud.
- ✓ **Exadata Cloud Services.** Oracle's highest performing and most available infrastructure, with the cost-effectiveness and scalability of the cloud.
- ✓ **Test / Dev.** Develop, test, and collaborate on new versions of applications in production-grade virtual data centers with whoever you like, whenever and wherever you like.
- ✓ **Sandbox Environments.** A secure and safe environment to validate new 12c features and emerging data sources for ever-growing BI developments.
- ✓ **Disaster Recovery.** Ensure high availability, exhaustive protection, and disaster recovery for mission critical data.
- ✓ **Lift and Shift.** Replicate in-house Oracle applications in the cloud - no redesign required.
- ✓ **Backup and Archive.** Eliminate expensive on premise storage with capacity on-demand.

Why Choose Oracle Cloud?

Join top organizations like Avaya, Skanska, and Kellogg's in using the Oracle Cloud Platform to transform your business.

Companies using the Oracle Cloud report benefits such as:

- Reduced ongoing expenditure for Oracle Support (Cloud vs. Legacy)
- Improved agility for test and development cycles
- Ability to burst into the cloud during times of high demand and peak data use, thus reducing day-to-day Oracle footprint
- Reduced OPEX related to physical infrastructure costs
- Improved speed and scalability

MiCORE's Cloud Service Offerings

Partner with our team of cloud experts to create, test, deploy, and manage a successful cloud solution and achieve end-to-end cloud enterprise modernization.

Cloud Readiness Assessment

Every new cloud initiative kicks off with a comprehensive Cloud Readiness Assessment.

- In-depth assessment of business and technical components
- High-level portfolio discovery
- Analysis of capabilities and resource gaps
- Identify opportunities for the cloud and where to start
- High-level strategy and recommendations for how to approach cloud computing

Cloud Solution Planning & Value Analysis

Above all, the cloud is a business decision. What is the financial impact for your company?

- Evaluate current Oracle license inventory
- Deliver a concise picture of how cloud computing may benefit your business goals
- Roadmap for how to transform operations and extract greater value from existing resources
- ROI/TCO Analysis and Business Plan development
- Assistance in quantifying ROI and benefit realization

Cloud Implementation & Migration

Reduce the risk and complexity of moving to the cloud with help from our migration engineers.

- End-to-end architecture, planning, and governance guidance
- In-depth portfolio discovery and rationalization
- Design cloud architecture and deployment roadmap
- Build, install, and configure cloud infrastructure
- Safe migration of data and applications into the new cloud solution
- Training and skills transfer

Cloud Support Services

Maintain optimum performance, security, and scalability of your cloud solution.

- 24x7x365 monitoring
- Security Monitoring
- Proactive Support: Feature enhancements, performance tuning, and patching
- Upgrade and configuration management
- Reporting and Application Maintenance
- Incident management and troubleshooting
- Documentation and roadmapping

Take Charge of Your Data

MiCORE's Oracle Cloud Solutions and related services focus on how to effectively manage and draw meaningful insight from the growing universe of organizational data. Using a customer-centric approach, MiCORE delivers the cloud strategies needed to successfully navigate the enterprise data challenges of today while building a solid strategy for success in the data-driven future.
