Engineered Systems

Drive business innovation with a lower-cost, lower-risk infrastructure.
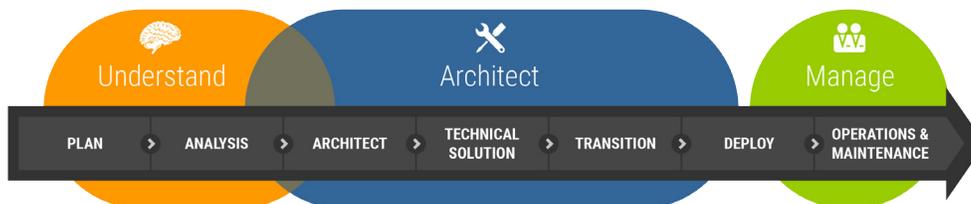

Overview

Oracle Engineered Systems combine best-of-breed hardware and software with game-changing technical innovations to deliver extreme performance. But it's not just about feeds and speeds. It's about zeroing in on and taking advantage of new opportunities, discovering new areas of efficiency, and enabling innovation that drives business performance.

Designed, engineered, and tested to work together, Oracle engineered systems deliver simplicity that translates into less risk and lower costs for your business. As an Oracle Gold Partner, we have certified professionals who can work with you design, implement, optimize, and manage these highly efficient engineered systems.

Make fast, data-driven decisions with a thoughtful, process-driven approach.

Data underlies today's fast-changing businesses. Using a proven, process-driven approach, we'll work closely with you to understand, manage, and architect your core infrastructure so you can make the data-driven decisions needed to succeed in a highly competitive environment.

- **Understand:** Taking the time to understand your business issues, so we can advise you on the best solution
- **Architect:** Putting your strategic plans into action with the right technologies to meet your business goals
- **Manage:** Helping to manage the day-to-day operations of your Engineered Systems environment, so you can focus on strategic business initiatives

Fast Facts

At MiCORE, we help companies optimize data management practices to deliver actionable intelligence and drive better business decisions.

- Headquartered in Reston, Virginia
- Established by former Oracle consulting professionals
- Oracle Certified Partner
- GSA Schedule IT/70, Contract Number GS35F0359

"...their Oracle expertise and ongoing support allows us to focus our efforts on further developing Webs.com industry-leading applications and capabilities, rather than spending resources managing Oracle."

Zeki Mokhtarzada,
Co-Founder and CTO, Webs

Drive your business goals.
We'll build the infrastructure to get you there.

Oracle Engineered Systems deliver simplicity that translates into less risk and lower costs for your business—and helps you reach your goals faster. As an Oracle Gold Partner, we specialize in Oracle technologies and have certified professionals who can work with you architect and implement these Engineered Systems:

- **Oracle Exadata Database Machine:** Engineered to be the highest performing and most available platform for running Oracle Database, Oracle Exadata runs all types of database workloads including Online Transaction Processing (OLTP), Data Warehousing (DW) and consolidation of mixed workloads. It's the ideal foundation for a consolidated database cloud.

- **Oracle Database Appliance:** The Oracle Database Appliance is a complete package of software, server, storage, and networking that's engineered for simplicity, supports database and application workloads, and saves time and money.

Focus on business-critical initiatives.
Let us manage the rest.

Our certified Oracle engineers can seamlessly support your team by filling resource or skill gaps. From performing routine maintenance and tuning to implementing best practices, our experts will manage your infrastructure so you have the time you need to drive more strategic initiatives.

Exadata Management Service

- 24/7/365 Exadata management
- Comprehensive system monitoring and daily maintenance
- Periodic health checks
- Quarterly patching management
- Ongoing system consolidation and database upgrades

Exadata Optimization Service

- Regularly scheduled Exadata system review and optimization
- Exadata performance tuning services *Database, Storage, Compression, etc.*
- High availability (HA) solutions
- Backup solutions

Get the attention your business demands
